# Convocation at Carleton University

The Convocation ceremony (the calling together of the academic assembly) has its roots in university traditions of medieval Europe.

## The Mace

The mace is a staff symbolizing authority. In the days of knighthood, it was a weapon, but after the 16th century it became solely a symbol of authority carried by a distinguished member of an assembly. It is used on ceremonial occasions to signify the right of an individual or institution to perform a certain function—in the case of universities, to grant degrees.

At Convocation, the mace is carried ahead of the Chancellor as he enters and leaves each ceremony. (Marshal of Convocation H.H.J. Nesbitt has performed this function for all but one of the University's 86 Convocations.) During the ceremony the mace is displayed on a special stand as an embodiment of the authority of the University.

Carleton's mace was presented to the University in 1976 as a gift from the Chairman of the Board of Governors at that time, Mr. Hyman Soloway. It is a silver-plated staff approximately three feet long. At the upper end there is a bowl marked with the University's coat of arms and the University motto in both Latin and English—"Opera Nobis Aeterna" and "Ours the Task Eternal." From the upper portion of the bowl rises a phoenix. Traditional oak leaves surround the lower end of the staff.

## Coat of Arms

Carleton University's coat of arms is described in heraldic terms as follows: "On a field sable; in radiants d'argent, a maple leaf gules charged with an open book; crest—a phoenix propre." It is comprised of a black shield bearing an open book on a red maple leaf surrounded by silver rays. The shield is surmounted by a phoenix, and below the shield is a scroll bearing the motto "Ours the Task Eternal."

The open book on the maple leaf signifies that Carleton University is in the nation's capital and that learning is open to all who wish to partake of it. The radiants are the light of learning. The phoenix, the legendary eternal bird, symbolizes the renewing of learning from older foundations, in recognition of Henry Marshall Tory's role in the founding of the University when he was 82 years old. "Ours the Task Eternal" is taken from a Walt Whitman poem entitled "Pioneers" and ties in with the eternal quality of the phoenix.

And so, the Carleton University coat of arms symbolizes sound learning, good citizenship, and the highest hopes of humanity.

## The Diploma

The diploma the graduates receive at Convocation is the certificate of qualification which publishes the fact that the student has fulfilled all the requirements and completed the prescribed course of study for the degree. As the senior academic legislative body of the University, it is the Senate which has determined whether the requirements have been met. The signatures of both the Chancellor and the President of the University appear on the diploma: the Chancellor because of his role in conferring the degree, and the President who, as Chairman of Senate, certifies that Senate has enacted the required motion to award the degree. The Seal of the University is affixed to the diploma as a mark of authentication.

## Academic Dress

The academic dress of Carleton University is a compromise between that found in the ancient foundations of Britain and Canada and the American Intercollegiate Code. All three hoods—bachelor's, master's, and doctor's—are of the simple or Oxford shape. Bachelor's is made of black stuff; master's and doctor's are made of black silk and all are lined with silver silk with two chevrons, one of red and one of black. From bachelor's to doctor's the hoods are progressively longer and opened to show more and more of the lining.

The velvet border of the hoods denotes the degrees granted according to the following colour combinations: architecture—cerise; arts—white; commerce—camel brown; computer science—royal blue; engineering—orange; industrial design—dark cardinal; journalism—white with a black cord sewn slightly in from the lower border; music—venetian pink; public administration—peacock blue; science—golden yellow; social work—cream; and doctor of philosophy—purple.

The bachelor's gown, to be worn with the above hoods, is of full length, made of black stuff, with a gathered yolk behind, and long open-fronted sleeves. The master's gown is of full style, made of black silk or rayon, with full gathered yolk behind, and closed sleeves with an opening at the elbows. The doctoral gown is the same style as the master's, made of fine royal blue cloth with facings of light blue silk.

The gown of the Honorary Doctor of Laws, Literature, Science, and Engineering is a full robe with bell-shaped sleeves, made of fine royal blue cloth with facings and sleeves in light blue silk. The hood is made of the same material as the gown, has the same lining as that for degrees by examination, and is bordered with dark mauve for the degree Doctor of Laws; vibrant blue for the degree Doctor of Literature; red for the degree Doctor of Science; and orange for the degree Doctor of Engineering.

The Presiding Officer of Convocation is the Chancellor,  
The Hon. Gordon Robertson, P.C., C.C., M.A., D.C.L., LL.D., D. de l'Univ., F.R.S.C.

## Recipients of Honorary Degrees

**Raymond A. Price**  
**B.Sc., M.A., Ph.D., P.Eng., F.G.S.A., F.R.S.C.**

Raymond A. Price, Acting Assistant Deputy Minister, Energy, Mines and Resources Canada, is being awarded the degree of Doctor of Science, *honoris causa*, at the first Convocation ceremony on Thursday morning, June 11.

Dr. Price is being awarded the degree "in recognition of his outstanding scholarly and administrative career as an earth scientist, which has extended to both the national and international levels."

Dr. Price taught in the Department of Geological Sciences at Queen's University from 1968 to 1981 and was named Director General of the Geological Survey of Canada in 1982. An internationally-recognized authority on the regional stratigraphic and tectonic history of the Southern Canadian Cordillera, he has authored more than 100 scientific publications. His work has led to the re-evaluation of previously-held theories in structural and tectonic history.

He is a Fellow of the Royal Society of Canada; Past-President of the International Council of Scientific Unions and the Inter-Union Commission on the Lithosphere; and was awarded the R.J.W. Douglas Medal by the Canadian Society of Petroleum Geologists in 1984, and the Logan Medal by the Geological Association of Canada in 1985.

**Richard D. Hiscocks**  
**M.B.E., B.A.Sc., D.Sc., LL.D., P.Eng.**

Richard D. Hiscocks is being awarded the degree of Doctor of Engineering, *honoris causa*, at the afternoon Convocation ceremony on Thursday, June 11.

Mr. Hiscocks is being awarded the degree "in recognition of his pioneering role in the design and development of a distinguished Canadian family of transport aircraft, and for leadership in the enhancement of co-operative research and development programs between industry and government."

Mr. Hiscocks began his career with work on aircraft structures at the National Research Council. After the Second World War, he joined the de Havilland Company and worked on the design of a unique family of aircraft which began with the "Beaver" bushplane. This was followed by the Otter, Caribou, and Buffalo series of STOL aircraft which established a substantial export business for Canadian industry. During this time he also lectured at the University of Toronto and the Institute of Aerospace Studies on Aircraft Design.
